

HANÁK[®]
COMPETITION

The Winners' Choice
2018 / 2019

The HANAK Competition products are the result of a long-term development and testing in cooperation with leading Czech fly fishermen. The quality tested by many competition winners is now available to all fly fishermen.

Superb XP **New**

Let us introduce a brand-new series of four piece, ultra-light, very fine yet powerful rods. **They are the best competition fly rods.** These rods were designed using the newest technology and highest quality materials available. These rods have been long-term tested and fine-tuned to absolute perfection, in cooperation with the best fly – fishermen and competitors in the World. As well as members of Team HANÁK Competition SUPERB STARS, and members of the Czech National Fly Fishing Team. **Each rod was designed and tested separately by the best Czech fly- fishermen in each discipline of fly-fishing.**

The blanks have been made using the latest HI-CARBON technology and materials in a special combination with NANO top-class filaments. Combining these blanks with extra light super quality components, we have succeeded in reducing the overall weight of these rods by about 30 % (up to 30 g) compared to conventional rods. The rods have super thin FUJI SIC stripper guides, and very durable and flexible titanium single leg guides RECOIL Titanflex - made in USA. The perfect design of the rods is underlined by the exclusive black real seat which incorporates an exotic wood insert. The handle is made from the highest quality AAAA grade cork. The matt gold olive finish of the blank prevents the disturbance of spooky fish by reducing rod flash.

Each rod is supplied in the luxurious pentagon rod tube with separate compartments for each rod section.

Antonín Pešek, World champion, Slovakia 2017

Superb Sea Trout New

A brand-new series of four-piece very light and extra powerful rods. Completely designed by František Hanák using the most up to date technology and highest quality materials available. Tested and fine-tuned to absolute perfection in the Rio Grande, Argentina. An unrivalled single handed fly rod specifically designed for trophy sea trout and salmon. All components are salt water resistant so it is also perfect for salt water fly fishing. The blanks have been made using the latest HI-CARBON technology and materials in a special combination with NANO top-class filaments. Combining these blanks with extra light super quality components, we have succeeded in drastically reducing the overall weight of these rods. The rods have super thin FUJI SIC stripper guides, and very durable and flexible titanium single leg guides RECOIL Titanflex - made in USA. The perfect design of the rods is underlined by the exclusive black salt water resistant real seat. The handle is made from the highest quality AAAA grade cork. The blank is dark blue in colour.

Sea Trout 896 & 8100 **New**

A very special powerful rod made from high quality modulated carbon. This rod was originally designed for sea trout fishing on the Danish coast, however it can also be successfully used for targeting other big fish such as pike. An exceptional rod action and high quality components both help to increase the hook up ratio, and to subdue and land even the strongest of fish. A full-wells quality cork handle with fighting butt increases comfort during casting and helps you to tame that fish of a life time.

Stillwater III 8100	305 cm	106 cm	# 8	3	121 g	Powerful stillwater rod for extra-long casts, usable also for roll cast technics.

Superb XP 13 & 35 **New**

Improved matt olive model of our famous reel Superb fits to design of our new rods range Superb XP. Modern ultra-large arbor reel is produced by machine-cut from 6061-grade air-aluminium bar stock in combination with stainless steel. Thanks to the large arbor design, it limits tangling, damaging of fly line and speed-up reeling. The unique closed cage prevents tangling and dragging fine long nymphing leaders out of the reel. Smooth function is guaranteed by two ball-bearings in combination with a super-roller bearing. The sensitive and reliable drag allows usage of fine leaders.

Hanák Competition Fly Lines

High quality fly - fishing lines produced in UK exclusively for Hanak Company. They enables easy and precise casting and are very durable. This series of lines results from long time development and testing in cooperation with top Czech fly fishermen. Complete series "Czech Lake Pro" with precisely braided and non-stretch core (except clear lines) is famous for high success rate of strike and unique tapering for fishing for shy fish in long distance. The series "Czech Nymph" covers all requests of demanding anglers and competitors. The series "Wave" combines high quality with unbeatable price.

Czech Lake Pro

AFTMA #7
Length 30,5 m

The label printed at the end of line.

Czech Lake Pro

59,90 €

Floating WF7F

Superb Dry floating line is smooth and supple and enables easy, long and accurate casts.

Hover Int Clear WF7H

Slow glass line (1 cm/s).

Fast Int Clear WF7FI

Fast glass line (4 cm/s).

Hang Marker

Slow Int Tip WF7F9SI

Floating line with slow intermediate tip (2 cm/s) 9' - 2,7 m.

Fast Int Tip WF7F9FI

Floating line with fast intermediate tip (4 cm/s) 9' - 2,7 m.

Slow Int WF7SI

Slow intermediate line (2 cm/s).

Fast Int WF7FI

Fast intermediate line (4 cm/s).

Hang Marker

Sinking 3 WF7S3

Full sinking line (8 cm/s)

Sinking 6 WF7S6

Full sinking line (15 cm/s)

Hang Marker

Hang Marker is located 5 metres from the end of the line.

Streamer MAXX WF6F/S - 200 grains **New**

New specialist fly line for streamer fishing, this is characterised by the use of a finely braided non-stretch core. This helps to achieve precise presentation of flies and also increases the hook up ratio. The fly line consists of three sections - olive floating running line with a super smooth finish which causes less friction when running through the guides, increasing your casting distance, 3 m long green intermediate head and 5 m long black fast sinking tip. This is composed of three separate parts which have different weights to ensure that the line stays level as it sinks, giving you direct contact with the flies. Teflon and other special additives ensure that the line stays usable even in the coldest of conditions. Both ends of the fly line are finished with micro-loops to ensure a strong and easy connection with both the backing and leader.

Streamer MAXX

59,90 €

Model	Length	AFTMA	Colour	Price
Streamer MAXX WF6F/S	27,5 m	# 6	olive / green / black	59,90 €

Camou Clear Intermediate

Almost invisible clear intermediate line with camou-pattern, very soft, no-memory, with extra smooth surface. Easy castable to long distances, straight during pulling, sensitive to soft takes, enables quick strikes. Micro-loops incorporated in both ends, label printed on the backing-end.

Barbless Hooks

Exceptional innovative design of our hooks incredibly increases efficiency of strike and landing of fish. This effect is reached by using HI Carbon steel and by the special shape of the hook finished with an extra-long needle point. Use of barbless hooks dramatically reduces damage to fish, it limits injury and shortens handling time caught fish.

Model		Shape	Price / package	Available sizes						
H 100 BL Dry Fly	Very fine hook for dry and wet flies with large and round angle and extra sharp point. Colour - black nickel.		4,90 € / 25 pcs		10	12	14	16	18	20

Tungsten beads

The heads of the nymphs play different roles during fishing, they attract fish by their flashes and colour, thanks to their weight they enable the nymphs to sink quickly to fishing zone and keep flies in the right position which is most effective.

Tungsten has a specific weight of 18 kg/dm³, which is nearly twice more than the lead. Therefore your flies can be slimmer and tinier, and more attractive for fish. Tungsten nymphs are absolutely essential for fishing in deep pools and fast streams.

Fluorocarbon

HANÁK Competition fluorocarbon tippet is ideal for fishing for spooky fish thanks to its revolutionary attributes. It is almost invisible in the water, it sinks quickly as it is two times heavier than water, doesn't lie on the surface and doesn't frighten fish. Fluorocarbon is denser, smoother and doesn't soak water and doesn't change its diameter and remains transparent. It is more durable and less elastic.

Proven top quality leader material in a cost-effective package 50 m and completely new mega spool of 150 m suitable especially for stillwater fishing. The large spool limits memory of the tippet, lasts longer, is easier to find in your bag. A blue rubber band prevents the tippet from tangling in your pocket or bag.
